KEY PROJECTS

Wanderlust

JavaScript, Node.js, MongoDB, Leaflet, OpenCage, Render

- Implemented a full-stack travel booking platform enabling users to explore, list and reserve villas/hotels.
- Integrated dynamic maps via Leaflet + OpenCage for real-time geolocation and nearby stay discovery.
- Deployed on Render with CI/CD and designed the backend to efficiently handle concurrent user requests.

TeamTrackr

React, Express.js, MongoDB, Tailwind CSS, Vercel, Render, Railway

- Built a full-stack project management platform enabling administrators to create projects, assign tasks, and manage team workflows.
- Implemented JWT-based authentication and role-based access control for secure Admin and Team Member operations.
- Built a task-tracking dashboard for team members to update progress and track deadlines.

Blog-hive

TypeScript, Hono, PostgreSQL, Prisma-Accelerate, Vercel

- Developed a markdown-enabled blogging platform featuring role-based routes and JWT authentication.
- Leveraged Prisma Accelerate to reduce heavy query latency by 40%.
- Serverless deployment on Vercel + Cloudflare Workers scaled to 10k monthly visitors at zero downtime.

Pay-nest

TypeScript, Next.js, PostgreSQL, Prisma, Tailwind CSS

- Built a peer-to-peer digital payment application with simulated bank webhooks for instant transfers.
- Added merchant payment flows and live balance tracking using PostgreSQL pub/sub.
- Achieved secure transaction handling, passing 100% of integration tests and lint checks.

TECHNICAL EXPERIENCE

- Deployed 3+ full-stack applications end-to-end (React / Node / PostgreSQL) on Vercel and AWS.
- Integrated CI/CD pipelines, user authentication, real-time mapping services and webhook simulations.
- **Competitive Programming:** 6-Star HackerRank; solved 1150+ LeetCode problems, earned the LeetCode 365 Days Badge, and maintained a 141-day coding streak, strengthening DSA and problem-solving skills.
